

NT labour market brief – January 2020

Key message

Labour market conditions in the Territory are stabilising. The unemployment rate remained unchanged, and employment levels have risen over eight consecutive months, accounting for an additional 4500 workers, including 3800 full-time workers. The participation rate still remains the highest of all jurisdictions, and continues to be well above the national average.

Employment

Notes

1. Original data.
2. Caution should be exercised in the use of this data as training data has a natural lag (up to six months after the commencement date) and are subject to future revisions.
3. It should be noted that this table provides trend data.
4. It should be noted that Darwin and regional NT data are original data with a three month rolling average.

Employment figures refer to Territory residents that are employed and do not capture persons working in the Territory that normally reside outside the Territory.

All data referred to in the brief are in trend terms, except for the apprentice and trainee data, which are in original terms.
