

# Tomato Potato Psyllid Project

Trapping at your home,  
community garden or school.

## Adopt-a-trap

Volunteer your garden to support insect research

Do you live in the Darwin or Palmerston area and have space to care for a tomato plant? We need your help!

We are searching for volunteer citizen scientists to set up insect traps in their gardens or on their balconies at home, community garden or school.

We will provide everything you need, including a free tomato plant!
