

Spray Technology Workshop

Do you apply agricultural chemicals on your hay, crop or
pasture paddocks?

Do you have sandalwood, mangoes, melons or garden
areas close by?

If so, this workshop is for you!

It doesn't matter if you are a full time farmer or live on a
lifestyle block. This workshop will give you the skills and
knowledge you need to reduce the risk of damaging off target
trees and crops

Where: Katherine Research Station

When: Tuesday 17th of October 2017

Time: 4.30-6.30pm
BBQ dinner provided

RSVP: By 13th of October
